New Customers

Carla's Pasta Selects Eagle

Carla's Pasta is a Leading manufacturer of homemade filled pasta's, Italian sauces and pesto's from fresh ingredients: Located in South Windsor, CT has selected Eagle as their automated data collection / wireless barcoding partner.

Phase I of this deployment includes Inventory Management and Warehouse Management. Operators with RF terminals will receive purchased raw materials, assign internal license plates, and print bar code labels simultaneously via Eagle's software. Finished goods will be lot controlled, and the lot number assigned will provide Carla's Pasta with FIFO inventory usage. Sales order picking operators will use RF terminals to pick/stage finished goods in FIFO order and validate that the correct item, lot and quantity are picked. Phase II will focus on the shop floor production reporting.

Confluence Outdoor Selects Eagle

Confluence Outdoor is an American manufacturer of Kayaks, canoes, and related accessories. Headquartered right in the middle of the Upstate paddling scene in Greenville, S.C., USA Confluence not only understands paddle sports, but each member of the

Confluence team is committed to helping every customer find his or her own paddling passion. Confluence's eight distinguished brands offer boats and accessories for everyone from beginners experimenting with recreational paddling to well-seasoned experts trading in for the latest play boat.

Phase I of the implementation will include Inventory Management, Advanced Repetitive, Warehouse Management, Shipping, and associated bar code label printing. Real-time label printing will span from inbound raw materials, product identification, and customer specific SSCC-18 labels. Phase II will include product tracking, the use of RFID is currently being reviewed.

More New Customers!

Eagle Europe are pleased to announce two new customers. Neopost Technologies Ltd, a leading supplier of business communication solutions, went live on Purchase Order Receipts, Inventory Transfers, and Cycle Counts during June 2016. In May 2016, Automotive Plastic Components Berlin, a manufacturer of interior panels for the automotive market, went live of Eagle 2015EE in both production and shipping areas.

In addition, Eagle has extended their partnership with Laerdal, a leading manufacturer of products that save lives. Eagle will be providing expertise around the control of both internal and external shipments of serialised items. Eagle have also provided our new Android technology on Zebra TC70 devices - [TC70 Overview](#)

"I believe Eagle's thorough engagement, their vast experience of both RFExpress & QAD, and their single point of contact to deliver a complete solution is exactly what we need to implement a successful AIDC solution". *Robin Wittmeyer, Project Manager, Laerdal Medical AS*

We look forward to working closely with these organisations over the coming years.

New Eagle Functionality

Eagle announces general availability on QAD 2016EE

As part of our continuing investment in to RF Express for QAD EA, Eagle is to announce RF Express's compatibility with QAD Enterprise Applications 2016EE. The new QAD release has already been delivered to a number of Eagle's major manufacturing customers and we are encouraging our other valued customers to look at the latest QAD upgrade.

The RF Express upgrade to QAD 2016EE can be delivered as part of existing customers' maintenance contracts, either on premise or in the QAD cloud. Eagle encourage all of our customers to upgrade to the latest QAD version.

New Eagle Transactions

Lot Status Change: Lot Status Change will allow the user to change the status of a particular lot across multiple locations. This is applicable for any of our customers using QAD's lot functionality. A lot/batch may have been received and a quantity of this batch moved to

a separate location for QC testing - and thus the whole batch would be on hold. This transaction will allow the batch to be released in all locations at the end of the QC process.

Alternatively, there may be a situation where a batch needs to be placed on hold, which could be in multiple locations or pallets. Previously each inventory record would have to be updated but this can now be done with a single transaction using RF Express.

Blind Tag Count: Eagle has added new functionality to help increase the flexibility and efficiency of a full physical stock take. With the complexities that may arise during stock count, the process may be long and inefficient. In conjunction with our partner IT Dynamics, we have created a new Blind Tag Count program to overcome these issues. Read more [here](#).

vLock: Lot Eagle has added new functionality to help our customers analyse locks within RF Express and QAD. By enabling this new function, the user can see all locks in the QAD system affecting a specific function. This helps track down users who may have left their QAD session in the middle of a transaction, thereby affecting their colleagues ability to perform transactions. This is available in versions 2015 onwards.

Staged Pick and Ship: Eagle has developed a whole new suite of programs added to RF Express for QAD for the handling, staging and shipments of goods. As part of this development, Eagle has incorporated enhanced functionality for the specific control of serial controlled items in picking and shipping. More information can be found in this document - [Staged Pick and Ship](#)

Additionally, Eagle have also updated and added a number of new features over the past 12 months. Please find the full list below - [List of New Functionality](#)

Events

Mid West User Group Fall Conference

Midwest
User Group

MWUG's Fall Conference, scheduled for September 18-20 at the Kalahari Resort in Sandusky, OH. As ever Eagle will be present with the latest version of RF Express for QAD software along with demonstrations of the new user interface on the latest data collection hardware. Please come and visit our booth.

QAD EMEA Conference

QAD EMEA Conference: November 16th, Birmingham Hilton Metropole

QAD's annual customer event is now on the horizon, Eagle will once again be sponsoring this event, with a dinner to be held on the evening of the 15th. Look out for your invitation soon!

You can register for this event [here!](#) We look forward to seeing you all there!

Other News

Certified as a Cisco Select Certified Partner:

Eagle has achieved all requirements for achieving Cisco Select Certified Partner, including personnel, support and specialisation. In addition, Eagle has also achieved the Small and Midsize Business Specialisation, proving the ability to provide sophisticated, value-added Cisco solutions through in-depth sales capabilities, technology skills and service offerings.

Congratulations to everyone involved. For more information on how we can assist on your Cisco projects, or if you would like a health check of your Wi-Fi installation, please contact us.

New Starters in Europe:

Eagle are pleased to announce two new starters to support our growth in Europe. Ashling O'Connell is our new Marketing Executive who will be involved with all of our day-to-day marketing activities including events, whilst Tony Taylor has joined the Eagle Consultancy team, and has already been involved in a number of customer projects. Tony has extensive experience of Process/F&B industries both from implementation of QAD & RF Express, and also shop floor experience, both physical and business process. A big warm welcome to both.

Did You Know?

11 of the top 100 Global OEM Part Suppliers gain value, benefits and rewards with Eagle's automated data collection / barcoding and wireless technology. Please contact Bill Paone to discuss how Eagle can benefit your business.
